

9th International Conference On Technical Communication Evolutions of the Discipline Call for Papers

You are invited by Clillac-Arp Research Laboratory and the EILA Department of University Paris Diderot:

Friday 29 January 2021, from 10.00 - 17.00
Videoconference (Zoom)

From device documentation to digital training, from UX writing to video tutorials, technical communication is a discipline that covers varied activities. It seems like a single job title will never cover that breadth of scope.

During the next 9th International Conference on technical communication, we will explore the job market, training curricula and evolutions of the trade.

We are looking for speakers to come and share practices and thoughts on the following points:

- The place taken by technical communication within organisation, and the usual business units it belongs to: product, support, marketing, HR...
- The evolution of skills, methods and tools.
- The challenge of technical communication training curricula to cover varied needs.
- The possible career paths in technical communications.

Talks will be 20 minutes long, followed by 10 minutes for questions and answers.

The conference is free to all.

We accept papers in French and in English.

Please send a 200-word summary **before 15 December 2020** to
patricia.minacori@eila.univ-paris-diderot.fr

Please include in your e-mail, your Name, University/Company, as well as a short biography.
